# **Project Design Phase - II**

## **Solution Requirements (Functional & Nonfunctional)**

Date	16 October 2022
Team ID	PNT2022TMID47920
Project Name	Industry-Specific Intelligent Fire Management System
Maximum Marks	4 Marks

## **Functional Requirements:**

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Requirements	Workers and Product Protection Automatic Sprinkler System
		Monitors Smoke, Gas and Temperature
FR-2	User Registration	Manual Registration
		Registration through webpage
		Registration through Form
		Registration through Gmail
FR-3	User Confirmation	Confirmation via Phone
		Confirmation via
		EmailConfirmation
		via OTP
FR-4	Payment Options	Cash on
		DeliveryNet
		Banking/UPI
		Credit/Debit/ATM Card
FR-5	Product Delivery	Door Step
	andInstallation	deliveryTake
		away
ED C	Decl. 4 Fee Heal	Free Installation and 1 year Warranty
FR-6	Product Feedback	Through Webpage Through Phone calls
		Through Phone calls Through Coogle forms
		Through Google forms

### **Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

FR	Non-	Description
No.	Functional	_
	Requirement	
NFR-1	Usability	Have a clear and self-explanatory manual.
		Easier to use.
		Easily accessible by everyone.
NFR-2	Security	Are inspected monthly by the Fire Alarm Technician.
		Inspected and tagged by a contractor annually.
NFR-3	Reliability	Hardware requires a regular checking and service
		Software may be updated periodically.
		Immediate alert is provided in case of any system failure.
NFR-4	Performance	The equipment must have a good user interfaceIt
		should have a minimal energy requirement
		It has to save lives of people and things
NFR-5	Availability	All the features will be available when the user requires.
		It depends on the need of the user and the customization of
		the user has done.
NFR-6	Scalability	The product has to cover all the space of
	-	industry irrespective of the size or area.

# Types of requirements

This is a recognized set of business analysis industry standards, offers the following classification of requirements.

### **Business requirements**

These include high-level statements of goals, objectives, and needs. <u>Business requirements</u> do not include any details or specific features. They just state the problem andthe business objective to be achieved such as

- increased revenue/throughput/customer reach,
- reduced expenses/errors,
- improved customer service, etc.

#### **Solution requirements**

Solution requirements describe specific characteristics that a product must have to meet the needs of the stakeholders and the business itself. They fall into two large groups.

- **Functional requirements** define what a product must do, what its features and functions are.
- **Nonfunctional requirements** describe the general properties of a system. They are also known as *quality attributes*.
